

# Reducing the risk of youth suicide through interactive performances in schools and communities.

Every 3 hours in Australia someone takes their life by way of suicide, and 15 more 12-17 year olds make an attempt (Ref: Orygen, 2017). In 2015 more young people aged 15-24 years died by suicide than any other means.

2005

2015

As a school community, we have a responsibility to support our youth, provide guidance, educate them on how to cope and give them advice on where they can turn to for help.

Mind Blank education supports the PDHPE Years 7-10 Curriculum

Mind Blank education has been built in collaboration with mental health experts

20,000

Mind Blank has so far performed in front of over 20,000 students

## Get in touch

Mind Blank has been voted by students and teachers as better than games, and as effective as Beyond Blue and PCYC programs. Get in touch to discuss a Mind Blank performance for your school.
